Hi, My name is Mike. I am 16 yrs old. Microsoft Corporation should be required to include Java with Windows XP. I go to a chat room called Wetbuster. Its for kids that wet the bed and have wetting problems. Its a place to talk and cope about it. You need Java to chat there, if there is no more Jave, then there no more wetbuster. Also tns of people wont beable to chat there either if you take it way. So please keep java.

THANK YOU
MIKE
